Industrial Coatings

An industrial coating job demands a very careful surface preparation & coating procedure. Climatic conditions in the Middle East are the harshest due to fierce heat, humidity, windblown abrasive particles, salt laden air in the coastal regions, effects of industrial and air pollution, etc. Any minor defect will increase the possibility of corrosion & erosion many folds & will make the whole process useless.

At ALPHA COATINGS every project is handled in an efficient, orderly manner by experts whose commitment to perfection and attention to details is unmatched in the business.

Decorative Coatings

In a real estate project, protecting and beautifying your investment is the right thing to do. A good paint job is the most effective way to prevent costly repairs down the road and adds value to the interior design of a housing project. At ALPHA COATINGS we provide services to our client's with close attention to details and work, to provide the highest level of service within the strictest budget. We stress professionalism, quality and versatility in painting techniques such as Marbelling, Sponging, Colour Washing, Flame Effect, Stenciling etc. ALPHA COATINGS eliminates guesswork and speaks the promise of beautiful results.

Concrete Repairs

Concrete repairs and rehabilitation require well versed team of professionals to determine the cause and offer the best solution. ALPHA COATINGS are approved applicators of most of the repair systems on the market and can help clients by evaluating specifications to give them the most cost effective solution to their problem. Our team of professionals can offer investigation or full design services where required.

At ALPHA COATINGS every project is handled in an efficient, orderly manner by experts whose commitment to perfection and attention to details is unmatched in the business.

EXCEEDING EXPECTATIONS WITH EVERY STROKE

The choice of colour reflects a person's personality and vision. The moment the selection of colour and the right shade is made, there arises the need for a good applicator to transfer the vision into reality.
